## INTRODUCTION.

---

CITY CLERK'S OFFICE,

November 18, 1907.

This volume contains an exact transcript of pages 279 to 561, inclusive, of Book VI. of the Old Records of the Town of Fitchburg, Mass., which includes the town meetings and selectmen's records, beginning March 4, 1844, and continuing to January 21, 1850. The printer's copy was prepared last year, and the work of printing has been done by the Sentinel Printing Company, the index having been prepared under the supervision of Mr. Frank C. Hoyt. The same general method has been used in this volume as in former volumes with reference to paging, the heavy figures enclosed in brackets representing the paging in the original book.

COMMONWEALTH OF MASSACHUSETTS.

WORCESTER, SS.

FITCHBURG, November 18, 1907.

I, WALTER A. DAVIS, City Clerk of the City of Fitchburg, hereby certify that the following, beginning with page 279 and ending with page 561 of Book VI., is a true and correct copy of so much of the Old Records of the Town of Fitchburg as is contained on the pages and in the volume named; except that the title, paging and explanatory marks and notes have been added in the present volume.

A handwritten signature in cursive script that reads "Walter A. Davis". The signature is fluid and elegant, with a large initial 'W' and a distinct 'A'.

*City Clerk.*

Subscribed and sworn to before me,

Adjournment of March Meeting April 7, 1845.

Scholars for six schools, one of two consequences must follow: either each district, under the existing arrangement, must have less money, or else a larger amount in all must be raised, the sum total remaining the same each district will have less: the amount for each district remaining the same the sum total will be increased, For instance, if the whole sum be \$600. each of the ten districts would have but \$60.; whereas with six districts only, each would receive \$100. or if you give to each district \$100. then you must raise \$1000. instead of \$600. and in the same proportion for any other sum.

Now take the matter in either way. Suppose first the sum taken to be fixed say at \$600.—in which case each of the districts can receive only the small amount \$60. instead of \$100. the result is a perplexingly small amount of school money. What shall the district do? Either have a short school or a poor teacher; and not unlikely in the anxiety to avoid each horn of the dilemma, the district may practically find itself pinned upon both. But suppose the school to obtain a good teacher, for a short term. Every body who has any knowledge of the matter knows, that it takes some time to get a school fairly in progress; so that in fact a school of two months is worth scarcely if at all more than half as much as the same school would be if continued three months. Here then is incurred the whole expenditure for getting ready to do what after all is to be left but half done, the half of the preparation money is

lost, absolutely thrown away. Suppose next that the district takes a poor teacher and has a school of reasonable length, then not merely is some portion of the expense of preparation sacrificed, but it may be that the whole amount of the money is as bad as wasted, nay actually worse. It is impossible to have a good school with a poor teacher. A good teacher is the very life and soul of the School; and lifeless and running to desolation must and will the school be without such a teacher.

We have spoken of good and poor teachers as having some connection with the price paid, And the fact is so, though the price is not an infallible test of the quality. School teachers are not a commodity carrying an implied warranty that a sound price shall secure a sound article.

March Meeting Adjournment April 7, 1845

But when a Commodity is so rare as are really good teachers, and the demand is so great it is in vain to expect to get a sound article without a sound price. The district then with a small amount of money must either pay a high price with the probability of getting a good teacher, or else pay an inferior price with all but the moral certainty, unless by some very accident, of getting a poor teacher. But more than all this, a district in the circumstances supposed, cannot ordinarily secure the services of a teacher of the first qualifications, even with the high price, such teachers do not desire such schools, They want Schools where a larger sphere of usefulness is open to them, and where they can be employed for a longer term of time, and they can and will get such Schools. It is little object to keep a small school for a short term, and a teacher of the kind in question will not do it, unless it be occasionally to piece out another School. Look now, at the matter in the other light. In the case Supposed, instead of having the sum total fixed and raising but \$600. in all,

thereby putting the districts on short allowance, assume that the amount for each district is fixed, say at \$100. You must then raise \$1000. for ten districts, instead of \$600. which would suffice for six. And this difference \$400. is so much money thrown away, unless you can show some countervailing advantage that is to result from having small schools. But we utterly deny that there is any such advantage. On the contrary we insist that a school of 15. or 20. or 25. even of all ages, labors under positive disadvantages, as compared with one having 40. Scholars.

March Meeting Adjournment April 7, 1845

Where the number of scholars is small, and those of all ages, it is impossible to having anything like suitable classes. In a great measure the scholars must proceed "solitary and alone." there are few scholars who, under such circumstances, can prosecute their studies to the best effect. They want the sense of companionship to stimulate them, and keep them properly braced up to the work. A. class of scholars of nearly the same age, and pursuing the same studies, will animate one another, will beguile the wearisomeness of their common way, and by contact will quicken and sharpen and invigorate each others intellectual powers and energies. Now to apply these principles to the case of our own schools, we have nine districts, including No. 12½ which on the first of May last contained an aggregate of 254. scholars between 4 and 16. years of age. This number distributed into five schools would give 51. for each. But the aggregate of attendance in those nine schools, taking our own scholars only, for the last year, was 194. which divided among five schools, would make 39. to each—a number by no means too large for one school. These nine districts, last year had \$712½ of school money. Three other districts had \$718½. The money of the nine districts fur-

nished an aggregate of schooling amounting to about 4400 weeks, making, if you allow 44 weeks, exclusive of vacations, for a year, 100 years of schooling. The money of the three districts furnished 6800 weeks or 155 years of schooling.—making in amount of time, 55 years additional or more than half as much again schooling, for the same amount of money, substantially. We do not pretend to say there was precisely that proportion of gain in the one case over the other: But we submit it to the judgment of any candid man whether it be not abundantly plain that here was a clear unequivocal and decided advantage, in point of economy, in the expenditure of the money, in one of these classes of schools over the other. When the districts are small, besides the great expense of instruction for each individual scholar, a disproportionately large share of the

money required for Schools must be expended upon the building, maintaining and warming of school-houses. The difference is not trifling in the expense of building and keeping in repair nine suitable School houses, though of a little smaller size, and five of a little larger size; and between maintaining nine fires or but five for warming them. In one word under such circumstances, the money, whether for instruction or the other uses of the schools, cannot be expended to the best advantage,—so as to tell to the best effect—so as to yield the full amount of benefit which it is capable of yielding. What renders it especially important that some action should be taken on this subject of districts, *now* is the undeniable fact that a number of the school-houses must have something done with them, and that speedily. A decent regard to the health, the reasonable comfort and the progress of the children imperatively demands that more suitable school houses should be provided than exist at present in several of the districts.

Some of those houses might be repaired; others are not worth repairing. Now there exists, we believe, pretty generally, a feeling that the present division of the town into school districts, is not a fit and proper one, and that it will probably, before long, be changed. In this unsettled and doubtful state of things, districts naturally feel reluctant to enter upon the building of new school houses, or the thorough repairing of old ones. Indeed, it is not desirable that they should do either any further than is actually necessary, until the matter has been definitely settled upon some basis. In regard to school houses the committee think it the more judicious course that the town should

as it is authorized by law to do, provide School Houses for the several School districts, at the common expense of the town. This course they believe will promote materially the interests of the schools. It will secure better school-houses throughout the town, and at a cheaper rate. When the districts provide their own houses, if they build, the whole expense must be borne by the inhabitants of the particular district. The temptation is therefore to put off building as long as possible—to make the old school house answer as long as it possibly will, and a good deal longer. And when they do come to build they are tempted to build a cheap house—which in the result is the very dearest and least economical kind of school house. And then the outlay comes all at once, and in districts containing but a small population, and those not wealthy, the expense of erecting a decent and suitable school house is a heavy burden—too heavy to be borne without actual and serious inconvenience to many. But if the town provide the school houses at the common expense, no one district will be content to help build good school houses for other districts, and remain with a poor &

miserable one for itself. The result will be that all will demand and eventually will obtain what all ought to have suitable School houses. And then if the town, at the common expense builds a school house or two this year, and another or two next, and so on until all are supplied, the burden being equally divided out among all, would not be sensibly, at least not oppressively felt by the inhabitants of any particular district. And there is in fact an actual saving of expense. if the time and trouble and cost of assessing and collecting separate school district taxes, to build or to repair School houses, as in this case the whole would go in with the general town taxes.

March Meeting Adjournment April 7. 1845

Another consideration of great weight is, that if the houses were provided by the town, the building of them would be more likely to be placed under such supervision as would secure better constructed, more comfortable & more suitable houses. But the present School houses belong to the respective districts. They were built at the expense of the districts and are their property. They are of very unequal value. It would therefore not be just, nor is it to be expected that the districts should surrender their School Houses to the town without compensation, as might be done were their value equally proportioned to the several districts. The plan proposed by the Committee which is believed will obviate all difficulties of this kind, is this; that the town provide school houses at the common expense for the several public schools, and that it purchase of the existing districts, at a fair appraisal, their respective school houses and rights to the soil on which they stand, and that this appraised value of the property of each district be divided among the persons who would be liable to pay a school district tax, in such district, on the first day of May next, and in proportion to the valuation on which such tax would

be assessed, and that the amount thus coming to each individual be credited to him towards paying his general town taxes. This course we think would operate justly towards all the districts and would be attended with little trouble or inconvenience. The inhabitants of each district having a school house which was built at their expense and is their property, would receive from the town the appraised value of such school house, whatever that might be. But there would be no need of any payment of money in the transaction.

March Meeting Adjournment April 7. 1845.

The town as a town raises money to purchase the school houses of the districts and for its other purposes, and the amount which each individual is to receive from the town as his share in his own school house will be credited to him and go so far towards paying his tax for purchasing the school houses and for other town purposes. These two things, the discontinuance of the present districts & the present purchase and future provision of school houses, the committee think must go together. They would never recommend to the town to undertake to furnish school-houses for the districts as they now are. It would be a waste of money in building the houses, to be followed by a continual waste in maintaining schools in them.

For the division of the town into school districts or proper portions for maintaining schools, we propose that a committee be chosen by the town consisting of a small number of impartial and disinterested individuals, competent judges of such matters, who should take an actual personal survey of the town for the purpose and make such geographical division of the territory as they shall deem fit, into districts; and define the limits of such districts; which division the town might afterwards establish & erect the several portions so divided off into regular school districts, if they should see fit.

In respect to the subject of a school to be kept for the benefit of the inhabitants of the whole town as indicated in the 10<sup>th</sup> article of the warrant, the committee by common consent forbear to propose any action at this time, or to express any opinion upon it. They regard the matter of the districts and School houses as one so absolutely fundamental, that they are unwilling to encumber it with any extraneous matters.

In regard to the amount of school money that should be raised, the committee think that a liberal advance should be made upon the sum heretofore raised, & such they believe to be the general opinion. They would propose a larger sum, but for the consideration that it will be necessary for the town to be at considerable expense in purchasing and providing school houses, should the course recommended by the committee be adopted. As the case stands they propose that the town raise the sum of \$2000. & that the money which shall be received from the state school fund the current year & the balance

not divided which was received from that source last year be added to that sum & the whole apportioned among the schools. As to the principle or mode of apportionment the committee have not deemed it advisable to recommend any specific course at this time. The money will not be needed until the winter schools commence and as there will undoubtedly be town meetings held before a long time for other purposes connected with the schools & other business, they have thought it best to leave the matter wholly untouched until it shall be ascertained what division if any, of the town into districts shall be made & established. In conclusion the committee submit the following several propositions which they recommend to the town for its adoption namely:

Proposition 1.<sup>st</sup> That the present division of the town into school districts be discontinued, such discontinuence to take effect on the 15<sup>th</sup> day of May next, from and after which day the existing school districts of the town, including No. 12½, shall be abolished; & that the town purchase of the several districts, at a fair & just appraisal, their respective school houses, & their right and interest in the land on which the same stand respectively, provided the said districts shall severally do and execute all needful acts and instruments for the transfer and conveyance to the town of their respective school houses and their interest in the land on which they stand on or before the said 15<sup>th</sup> day of May next, reserving to the several districts the school money which has been apportioned to them, to be expended under the present system by the several prudential committees now chosen for maintaining summer schools in the present school houses in those districts; & that henceforth the town provide at the common expense of the town, school houses for the

several school districts that shall be formed within its limits.

Proposition 2. That a committee of three suitable persons be chosen by ballot who shall as soon as conveniently may be appraise and value the school houses of the several districts, and the right and interest of such districts in the land on which the same stand respectively, and shall report such appraised value to the assessors of the town; and that such appraised value of the school house and land of each district shall be apportioned by the assessors among the persons who shall be liable on the first day of May next to have a school district tax assessed upon them, in such district, and in proportion to the valuation on which such tax would be assessed, and that the shares of such persons respectively be credited to them towards the payment of their town taxes and that of the

appraised value of the school house & land of No. 12½. the same proportional part be paid to the persons liable to a school district tax on the first of May next, in that part of the district which is in Lunenburg, which was paid by the said Lunenburg portion of the district towards building the house & procuring the building spot. provided always that the said several districts shall do and execute all needful acts and instruments for the transfer and conveyance of their respective school houses and lands to the town as aforesaid.

Proposition 3. That a committee of three individuals be chosen by ballot who shall make a personal examination and survey of the whole territory of the town and shall divide the town geographically into school districts, and determine the limits of such districts, and who shall before the first day of June next, make to the town, or file in the town clerk's office a report of their doings in the premises, such report to be subject to the future action of the town.

Proposition 4. That the town raise for the support of common Schools for the current year including only the wages & board of teachers and fuel for the schools, the sum of \$2000.

Road Petitioned by Ivers Phillips from Warren Parkhursts to near the House of Abel Simonds established by the

County Commissioners—

Commonwealth of Massachusetts, Worcester fs. At a meeting of the County Commissioners of the County of Worcester held at Worcester within and

for the County of Worcester on the second Tuesday of September 1846.— Whereas Ivers Phillips of Fitchburg in said County by his petition has represented that John T. Farwell himself and others on the first day of June instant, petitioned the Selectmen of said Fitchburg to lay out a town way for the use of said town beginning near the house of Warren Parkhurst, and terminating near the junction of the Ashburnham and Westminster road in said Fitchburg, that said Selectmen after legal notice had been given to all parties interested proceeded to lay out and did lay out a town way as prayed for aforesaid as follows: Beginning at a stake & stones on the northerly side of the road leading from the house of William Downe to the house of Warren Parkhurst and on the easterly side of a small brook about 20 rods from said Parkhursts house thence north  $2^{\circ} 45'$  East thirty rods and seventeen links on land of said Parkhurst to a stake & stones on the east side of said Parkhursts brick yard; thence North  $13^{\circ}$  west eighty two and one half rods partly on land of Warren Parkhurst and partly on land of the Vermont & Massachusetts Railroad Co to a point near the centre of said rail road track thence north  $4^{\circ} 45'$  west fourteen rods on land of said Railroad Co. Alvah Crocker and Farwell & Simonds to the County road leading from Fitchburg to Westminster, near the house of Abel Simonds. The road. to lie on the Easterly side of said course and to be three rods wide to the Northerly bank of the Nashua River, thence widening on the easterly side of said way, the course thereof running North  $29^{\circ}$  East fourteen rods to a post at the last mentioned road near the barn formerly owned by George Bowker. And the said Selectmen agreed

[405] for damages as follows. with the said Warren Parkhurst for passing over his land the sum. of \$75,00 and the said Vermont and Massachusetts Rail Road co. Alvah Crocker and Farwell & Simonds relinquish

all damage for laying out said way on their land; and the said Selectmen reported said road and their doings aforesaid to the Town for their acceptance; and when accepted and recorded was forever after to be known as a public town way: and the said Selectmen thereupon duly & legally called a town meeting of the inhabitants of said town of Fitchburg to act upon, approve and allow said town way laid out as aforesaid to be held on the fifteenth day of said June at one O'clock. P. M. and on the eight's day of said June said Selectmen lodged and filed in the Clerk's office of said town a detailed report of their laying out of said town way as the Statute in such case provides. And the said Phillips further says that the town meeting was held as above called and the town voted to lay the subject matter of the town way laid out as aforesaid by said Selectmen upon the table and without any further action upon said town way. it was voted to adjourn and they did adjourn said town meeting to the second Monday of November next at one o'clock P. M. Wherefore the Petitioner alleges that said town did unreasonably refuse or delay to approve and allow the said town way laid out by the Selectmen thereof and to put the same on record and he is agrieved by such refusal or delay, and respectfully requests the Commissioners after due notice and other legal proceedings to approve and allow of the town way aforesaid as laid out by said Selectmen and direct the said laying out and acceptance to be recorded by the Clerk of said town of Fitchburg according to the Statute in such case made and provided. On the petition aforesaid the County Commissioners caused notice to be

[406]

given to all persons and corporations interested therein. that they would meet at the public house in said Fitchburg lately kept by Marble Putnam on monday the third day of August last at two of the clock in the afternoon by publishing an attested copy of said petition and of the order thereon in the Fitchburg

Sentinel a newspaper printed in said Fitchburg three weeks successively the last publication being fourteen days at least before the said third day of August last and by Causing the Town Clerk of the said town of Fitchburg to be served by Kilburn Harwood a Deputy Sheriff of said County with an attested copy of said petition and order thirty days at least and also by posting up in two public places in said town of Fitchburg attested copies thereof fourteen days at least before the said third day of August last; at which time & place the said Commissioners would proceed to view the route set forth in said petition to hear all persons and corporations interested therein who might then and there desire to be heard thereon. and if they should adjudge that the prayer of said petition ought to be granted, then to approve and allow of said town way so laid out over the rout above described and direct the same to be recorded by the Clerk of said town of Fitchburg agreeably to law.

The County Commissioners having met at the time and place and for the purpose before mentioned and having viewed the rout set forth in said petition and heard all persons and corporations interested therein who expressed a desire to be heard thereon adjudged that the inhabitants of the town of Fitchburg did unreasonably refuse and neglect to accept the report of the Selectmen of said town of the laying out

of the road described in the petition of Ivers Phillips The location as made by the Selectmen of the town Fitchburg which the Commissioners approve and allow is as follows to wit: We the Subscribers Selectmen of Fitchburg have laid out for the use of the town a town way as follows: Beginning at a stake and stones on the northerly side of the road leading from the house of William Downe to the house of Warren Parkhurst and on the easterly side of a small brook about twenty rods from said Parkhurst,s house

thence north two degrees and forty five minutes east thirty rods and seventeen links on land of said Parkhurst to a stake and stones on the east side of said Parkhurst's brick yard thence north thirteen degrees west eighty two and one half rods partly on land of Warren Parkhurst and partly on land of the Vermont and Massachusetts Railroad Company to a point near the Centre of said railroad track thence north four degrees and forty five minutes west fourteen rods on land of said Railroad Company — — Alvah Crocker and Farwell and Simonds to the County road leading from Fitchburg to Westminster near the house of Abel Simonds. The road to lie on the easterly side of said course and to be three rods wide to the northerly bank of the Nashua River there widening on the easterly side of said way. The course thereof running north twenty nine degrees east fourteen rods to a post at the last mentioned road. near the barn formerly owned by George Bowker And we have agreed for damages as follows: with the said Warren Parkhurst for passing over his land the sum of seventy five dollars — — — — — \$75.00 And the said Vermont & Massachusetts Railroad Company Alvah Crocker and Farwell and Simonds relinquish all damages for laying said way over their land Which said road is hereby reported to the town for their acceptance and when accepted and recorded is forever after to be known as a public town way. Dated at Fitchburg this eighth day of June 1846

And it is ordered that the term of twenty days be allowed the several owners of land over which said town road is located to remove their wood timber and trees thereon lying standing and growing—

And it is further ordered that the said town of Fitchburg cause the town road aforesaid to be

worked and made safe and convenient for travellers to pass over with their horses Cattle teams carts and carriages and that it be so made before the first day of September 1847.

And it is further ordered that a copy of this adjudication be transmitted to the town Clerk of the town of Fitchburg there to be recorded in said town's Book of Records that the said road may be forever known and mentioned as a town road.

Report on  
the Alteration  
of Road by  
Jonas  
Marshall.

The Committee to whome the Subject of this Article was referred made here the following Report  
“Your Committee chosen at the last March meeting to examine the hill near the house of Mr Jonas Marshall have attended to that duty and Report as follows—Your Committee are unanimous in the opinion that something must be done to remedy that hill, that

if the Town do not do it the County Commissioners will if they are applied to, your Committee undertook to estimate the expense of reducing the hill in two different ways, the first was by filling the valley between the House of Mr Marshall and the house of Wm. Carleton so as to make it an inclined plane which will reduce the hill to  $3\frac{1}{2}$  degrees. your Committee by making an estimate as near as they could came to the conclusion that 1500. yards would make that fill and that could be done for 10. cents pr yard making \$150. of which if this course is adopted Mr Marshall will pay \$25, and Mr Sheldon & Carleton \$25. leaving \$100. for the Town to pay. your Committee are of Opinion that if this course is adopted it will be necessary that a small fill be made easterly of Mr Marshalls House which will probably cost \$20. more which will make \$120. The other course to reduce the hill was by making a cut of two feet on the top of the hill and fill to make it an inclined plain to near the house of Carleton which will reduce the hill to 3 degrees which your committee are of opinion can be done for \$100. if this course is adopted Mr Sheldon & Carleton will pay \$50. towards the expenses in this case Mr Marshall claims damages. he was urged to name the amount to which he replied he should get all he could.

Report.

We the subscribers a Committee to whome was refered the whole subject matter of the Eleventh Article in the Warrant for the annual March meeting for the year 1848. have attended to that duty and now offer the following Report.

We learne from statistics prepared by the School Committee that there were on the first day of last May 1045. children in town between the ages of 4. and 16. & that 632. of them resided in District No 1. We have also ascertained that ten hundred and twenty two scholars of all ages attended school in town last winter that

**[481]**

March Meeting Adjournment April 3. 1848.

five hundred and ninty three of them belonged to & attended school in District No 1. and that about one

hundred scholars in said District of a proper age to go to school & who did go to private schools did not attend the common School and it is presumed the principal reason was they could not be accommodated there. We have also ascertained that about \$1800 have been paid during the last year for private tuition in this district, a small portion of it by Scholars from other towns. It appears from the above statements that about two thirds of all the scholars in town between the ages of 4. & 16. belong to this District & that there are seven hundred scholars who have a right to be accommodated in this District with suitable rooms in which to attend school. There are now in the District seven School Rooms, one to one hundred scholars (or reckoning sixty scholars to a school) enough to accommodate four hundred and twenty scholars. From this statement of facts it appears to be absolutely necessary that the Town should provide more School Rooms for the use of this District. We have examined "the Academy" lot and building and ascertained that the estate can probably be bought for \$2200. We think the location a good one for a school House & that it is this part of the District where one is most needed. There is more land than would be needed but it is saleable—the building needs some repairs and alterations. We think if the estate can be bought for \$2200. land enough may be sold off to amount to a sum sufficient to pay for putting this house in good condition for schools & still have land left sufficient to build another School house upon when it becomes necessary to do so—We therefore recommend to the Town to choose a committee & authorise them to purchase said estate (if it can be had for that sum) receive a Deed for the same & also

March Meeting Adj. April 1848.

Authorise to sell such parts as are not needed for school purposes & give Deeds of & receive pay for

the same & put the house in proper condition to be occupied for District schools.

District  
No 3.

In District No. 3. the House is not large enough for the school; but as the contemplated Fitchburg & Worcester Rail Road may pass so near the present School House as to render the present location an unsuitable one: We recommend to the town to take no farther action concerning a School House in that District until something more definite is ascertained about the location of said Rail Road.

modate the present number of Scholars. We also find the Fitchburg and Worcester R. Road located so near the School house as to cause some inconvenience—The town holds a lease of the land where the School House stands to run as long as it is used for that purpose—when it will revert to the Lessor Doct Abel Fox—The House is valuable to be fitted up for a tenement where it now stands but is worth but little to be moved—If a clear title to the land can be obtained at a fair rate we recommend to the town to buy it and then Sell out the whole concern & build a house some where on the town farm for the use of the District with two school rooms—If no satisfactory arrangement can be made with Doct. Fox we advise the town to erect a house on the Town Farm directly opposite the present School House with one School Room to be used for one School & that the present house be repaired and used when it is necessary to have two schools—At all events we advise the town to use the Old house unless it can be sold for enough to pay

the difference in cost between a house for one School and a house for two Schools—If a new House is to be built for two schools we think the best place to locate it is in the Grove opposite the house lately occupied by Mr John L. Chandler.

District  
No 5.

In District No. 5. we find the house is Old, out of repair, to small for the district & not in the right place—Since the house was built the population has changed materially a part of the territory which was then uninhabited now contains probably more than one third of the population of the whole District & on the opposite side of the District the population has diminished. Capt Edwin Upton's house appears to be the most central point: that is the aggregate of travel for all the scholars would probably be less to get to that spot than any other in the District: we think the distance is not unreasonable for any of the

scholars to travel & there are no more scholars than can be well accommodated in one School Therefore we recommend that ground be purchased (if it can be bought at a fair price) and a house erected to accommodate the District at the most convenient point between Capt Edwin Uptons house and the Vt. & Mafs. Rail Road & the Old house and land be sold.
